

- Shri Ravi Shankar Prasad
Hon'ble Union Minister
Ministry of Electronics & IT and Law & Justice

Ministry of Electronics and Information Technology (MeitY) along with National Informatics Centre (NIC), the nodal information technology arm of Government of India, has developed Electronic Transaction Aggregation & Analysis Layer (eTaal) portal (URL: <http://etaal.gov.in>). This portal provides an aggregated view of e-Transactions done through e-Governance applications implemented including, but not limited to, the national-level mission mode projects (MMPs) under the National e-Governance Plan (NeGP). The dashboard also facilitates quick analysis of data of various applications in tabular as well as graphical form enabling users to drill down to the lowest level of detail without compromising security and integrity of the servers from where data has been captured.

eTaal portal provides the e-Transactions count of e-Services delivered to the citizens across the country. eTaal has a nationwide acceptability as data is being captured for approx. 3572 e-Services from 21 Central Ministries, 36 States/UTs and 21 Mission Mode Projects (MMPs). **Over 7,210 crore transactions have been recorded so far since the inception of the project in 2013.**

On 10th June 2018, Shri Ravi Shankar Prasad, Hon'ble Union Minister, Ministry of Electronics & Information Technology and Law & Justice, tweeted "***In the month of May 2018, citizens across the country have done 246 crore e-transactions through various government portals.***"
