### 1. Introduction

All Ministries and Departments of Central and State/UT Governments have been implementing egovernance projects for providing e-Services to citizens. An idea about the impact of e-Services can be obtained from the number of e-Transactions taking place under these applications implemented by various Government Ministries/Departments.

Accordingly, Ministry of Electronics and Information Technology (MeitY) and National Informatics Centre (NIC) have developed the Electronic Transaction Aggregation & Analysis Layer (eTaal) portal (URL: http://etaal.gov.in) to provide an aggregated view of e-Transactions performed through e-Governance applications implemented including, but not limited to, the national-level mission mode projects (MMPs) under the National e-Governance Plan (NegP). eTaal automatically pulls the e-transaction count, but not the personal details, from the applications using web service technology. The dashboard also facilitates quick analysis of data of various applications in tabular as well as graphical form enabling users to drill down to the lowest level of detail without compromising security and integrity of the servers from where data has been captured.

eTaal serves as a platform for providing integrated, real-time aggregated view of e-Transaction statistics for major e-Governance programmes which are govt-to-Citizen (G2C), Govt-to-Business (G2B) and Business-to-Citizen (B2C) in nature.

The category of stakeholders comprise of:

- 1) Central Ministries/ State & UT Governments/ Departments
- 2) Academic institutions and researchers
- 3) Non-Governmental Organisations
- 4) Citizens

eTaal facilitates quick analysis of transaction data shared by various applications in tabular as well as graphical form enabling the user to drill down to the lowest possible level. It also enables the user Ministry/Department to view the consolidated picture of e-Transaction statistics of various e-Governance projects across the country and to visualize the status of utilization of various e-Governance applications running across the country.

eTaal provides visibility to the number of e-Transactions in national and state level e-Governance services being provided in the country. The e-Transaction count for services registered on eTaal portal has been increasing on yearly basis and 3020 eServices from 21 Central Ministries and all 36 States/UTs and 20 Mission Mode Projects (MMPs) have been registered with eTaal as on 21st June 2016. This reflects the government-wide acceptability of eTaal. Around 1600 crores e-transaction count have been recorded so far since the inception of the project in 2013.

Government is implementing digital India programme as an umbrella programme to prepare India for knowledge based transformation into a digitally empowered Society and knowledge economy. Government has also proposed to implement "e-Kranti: National e-Governance Plan (NegP) 2.0" under the digital India programme with a vision to transform e-Governance for transforming Governance and keeping in view the need to utilize emerging technologies.

The eKranti or NegP 2.0 framework proposes new and substantially revised models of implementation and service delivery. NegP 2.0 envisages government wide transformation by delivering all government services electronically to the citizens through integrated and interoperable systems via multiple modes.

The present eTaal system deals with quantitative analysis only. As per discussions held in the Apex Committee meeting on e-Governance, it was highlighted that eTaal portal, which captures e-Transactions for various MMPs / e-Governance projects should be improvised to capture the qualitative aspects as well.

In view of eKranti framework, a plan is afloat to develop eTaal 2.0 to address the qualitative aspects of service delivery, thereby, bringing in the concept of 'QUANTILITY', which means 'QUANTILy' with 'quaLITY'.

For the improvisation of the application, the following features are planned to be incorporated under eTaal 2.0:

- Weighted average system for various services A system is being developed for assigning appropriate weightages for various categories of eServices for qualitative analysis of the service data and ranking of projects and states on standardized parameters. The strategy is to define parameters to measure service quality and then assign weights and develop frameworks.
- e-Service directory To facilitate the view of e-Services being delivered across the country, e-Service directory is being developed. The e-Service directory provides the details of e-Governance application delivering the service along with the details of spatial spread for a given service. It helps citizens in finding state level services grouped in a particular standard service.
- Business Intelligence (BI) Tools BI will give extra edge to eTaal and establish it as the most logical choice for monitoring and tracking the progress of various initiatives as well as decision making by the government.
- State Portal- A personalized portal for states and union territories by the name of "State Portal" is being implemented on the eTaal website. It helps citizen in finding state level services grouped in a particular standard service.
- Mobile Application for eTaal- Mobile Application for eTaal is being developed and using this app, currently, the users can get the information of e-Transaction count through their mobiles.

### **1.1** Purpose of the Document

The purpose of the document is to enable the user to identify e-Transactions, categorize various services and effectively use the application. The user may further view the e-Transaction count for various Central and State projects and MMPs as well as perform various analysis.

The document also aims at providing the users all the necessary information for registration of their respective services and integration of the data from those services with eTaal.

### **1.2** What is an e-Transaction

An e-Transaction is a transaction delivering public service using ICT tools to improve access, enhance transparency and reduce response time while also satisfying all of the following four conditions:

- a. Service is requested through electronic means (self-access or assisted access) including mobile devices
- b. Workflow/approval process is electronic
- c. Database is electronic/digitised
- d. Service delivery is electronic Across the Counter Services

In several instances, the relevant information is proactively collected, digitised, verified and stored in digital repository and when the citizen requires the service, he/she can avail it immediately across the counter. Since, such cases fulfil all the pre-requisites of an e-Transaction, these can be considered as Across the Counter services.

### **1.3** List of Standard Services

A large number of services are being offered by various Ministries/ Departments/ Organizations at Central and State governments. However, the name of a particular service may vary across the states. For example, the Record of Right (RoR) is known as Pahani, Khatauni, Patta etc. in different states. For ease of classification, grouping and presentation in a uniform manner, the services have been defined by NIC and MeitY as follows:

SI. No.	Standard Service	Description
1	Certificates	All type of statutory certificates issued by government i.e. Caste Certificate, Income Certificate, Birth Certificate etc. come under this category.
2	Licenses and Permits	Services related to licenses & permits like arm licenses, inner line permits, etc. come under this category.
3	Land Records	Services related to land registration come under this category.

SI. No.	Standard Service	Description	
4	Integrated Finance Management Services	Integrated Finance Management Services includes services related to finance management like treasuries.	
5	Commercial Tax	It includes services like dealers Registration, VAT Return payments etc.	
6	Utility Services and Bill Payment	Utility services like electricity, gas, water, telephone etc. and their bill payment come under this category.	
7	Social Welfare and Pension	It includes services like Sr. citizen, old age/widow pension, freedom fighter pension etc.	
8	Transport	It includes services like driving License Issue, Registration of Vehicle, Transfer of Ownership etc.	
9	Education	Services like backward class scholarship, post metric scholarship etc. are covered.	
10	Public Distribution System	It include services like Issue of Ration Card, Modification of details in Ration Card, etc.	
11	Agriculture & Allied	The services under this category are: Agriculture Market Information, Agricultural Advisory Service, Animal Disease Alert, etc.	
12	Court and Judiciary	It includes services like cause list, case proceedings, certified copy of judgment/daily order, etc.	
13	Election	This service includes Electoral Roll Creation etc.	
14	Police	This includes services like FIR Lodged, Missing/ Lost perso etc.	
15	Personnel and Admin	This includes services like Employee Training, posting/transfer, ACR status monitoring, etc.	
16	Grievance	This includes services like grievances Received & Redressed.	
17	RTI	This group includes any e-transaction related to RTI Act.	
18	Information Service It provides data/knowledge/information on various offered through dial.gov service, forms download Programs and schemes etc.		
19	Property Registration	Services related to registration of property acquired or transferred come under this category.	
20	Health	Services like Child Registration, Pregnant Women Registration, Patient Registration, etc. come under this category.	

SI. No.	Standard Service	Description
21	Rural Development	Services like Job Card Issued, Job Demanded and Job Provided under MGNREGA are included here.
22	Employment	This includes services related to registration of potential candidates/ unemployed youth etc.
23	e-Procurement	It includes services like No. of Bidders Enrolled, No. of Tenders Created, No. of Bids Received, etc.
24	Industry and Commerce	It includes services like Registration of Companies, Registration of LLPs etc.
25	Urban development including Municipality Services	It includes services like Flat allotment and municipality taxes by State development authority.
26	Passport & Visa Services	It includes services related to passport and visa.
27	Financial Inclusion	It includes services related to financial inclusion.
28	Skill Development	It includes services related to skill development.
29	State Specific Services	There are certain services that are specific to a particular state. Those services are not found in other state. Such services come under this group.
30	Other Services	Services which are not included in any of the above mentioned standard services are covered under this group.

### 1.4 List of Category of Services

Services being offered by various Ministries/ Departments / Organizations at Central and State Governments have been classified into six categories, namely;

#### a. Category A comprises:

- i. All statutory services
- ii. Payment of taxes by citizens (Income Tax/VAT etc.)
- iii. Payment of subsidies/ Scholarships/ Social benefit transfers (DBT etc.)
- iv. Non-statutory services
- v. Services delivered under PDS/Rural development schemes
- b. Category B comprises Utility Bill payments (Water bill, telephone bill, electricity bill etc.)
- c. **Category C** comprises other B2C Transactions (e.g. banking transactions, addition of mobile numbers in do Not Call registry by Telecom service providers etc.)

#### d. Category D comprises:

- i. Information access from various e-Governance Portals/Websites after login
- ii. Down loading of forms
- iii. Enquiry (such as Passport Status, dial.gov.in service, result of an examination etc.)
- e. **Category E** comprises Repetitive government disbursements to citizens like social sector pensions, MGNREGA Payment, DBT, and Scholarships etc. which are periodic in nature are to be accounted in this category.
- f. Category F comprises End-to-end services delivered through mobile device.

### 2. How to Access the Dashboard

The portal may be accessed using the following URL:

http://etaal.gov.in

Following Home Page will be displayed:

### 3. Functionalities of eTaal

Major functionalities incorporated in eTaal web portal are as follows:

- 1. e-Transaction view of Central / State govt. Projects aggregated at various levels.
- 2. Viewing e-Transaction count on the basis of standard service.
- 3. e-Transaction view for MMPs aggregated at various levels.
- 4. Viewing e-Transaction count on the basis of Across the Counter Service.
- 5. Viewing e-Transaction count of NOFN Service.
- 6. Viewing e-Transaction count on the basis of category of services.
- 7. Drill-down feature to get detailed view of e-Transaction count.
- 8. Time line analysis of e-Transaction count across time-periods.
- 9. Graphical and Tabular presentation of e-Transaction count.
- 10.Service enrolment feature.
- 11. The homepage of eTaal displays the names of Top 5 Projects and States/UTs on the basis of the monthly transaction count.

eTaal Home Page

### Home Page Menu Bar

1	Home	This is the landing page of eTaal.
2	e-Transactions View	It shows the e-Transactions of various eServices under the
		following categories:
		i. Central Govt Projects
		ii. State govt Projects
		iii. Standard Services
		iv. Mission Mode Projects
		v. Across The Counter
		vi. NOFN
		vii.Categories
3	Analysis	It shows the different type of graphical analysis on e-Transaction
		data. The various categories of analysis available under this tab
		are as follows:
		i. Time Line Analysis
		ii. Comparative Analysis
		iii. Line Chart Analysis
		iv. Analysis of Services
4	Report	The Report tab on the eTaal homepage shows the different types
		of reports generated on the basis of the services e-Transaction
		count. The various categories of Reports generated under this
		tab are as follows:
		I. State Wise Transaction Per 1000 Population
		II. State Wise Transaction Per Services
		iii. Category Wise Transaction
5	Service directory	It provides the view of eServices being delivered across the
		country. The users can search for the relevant services on the
		jasis of following search parameters:
		I. Type I.e State, Ministry & All
		ii. Select the relevant state / winistry / All
		III. Category
6	Ctata Davital	v. Service Name
6	State Portal	The link State Portal on the eraal dashboard, allows the
		interface contains separate links for all the 36 states and union
		territories. The link of individual states further redirects the
		user to the individual state portal from where a user can view
		the total transaction count and the e-Transaction count of the
		various standard services integrated with the specific state.

7	FAQs	<ul> <li>The FAQs link on eTaal Menu provides the responses to Users on few of the general queries pertaining to eTaal application.</li> <li>The queries responded to comprise of: <ol> <li>What is e-Transaction?</li> <li>What are the e-Transaction Categories?</li> <li>What are the Standard Services?</li> <li>How to get e-Transaction count on SMS?</li> <li>What is Across the Counter Service?</li> <li>How to register e-Service?</li> <li>How to write Sample Web Service in .Net?</li> </ol> </li> <li>How to write Sample Web Service in Java?</li> </ul>
8	User	<ul> <li>The User menu provides the following two links:</li> <li>i. Sign up – This enables the new users (State/Ministry/Other) to sign up on eTaal</li> <li>ii. Login – Registered users can login to eTaal from here. It enables the users to login to eTaal with their registered email id and password</li> </ul>
9	Accolades	<ul> <li>The menu Accolades provides the following two sub-menus:</li> <li>i. Awards - It provides the updates on the various awards as won by the project</li> <li>ii. News- This section provides the news pertaining to eTaal as published in leading newspapers and from other sources</li> </ul>

### eTaal National e-Transaction Count

This section of the eTaal Homepage provides the integrated, near real-time aggregated view of e-Transaction statistics for the following:

- 1. Since starting of the current year
- 2. Since starting of the current month
- 3. Total number of e-Services Integrated

The counter provides the e-Transaction count, consolidated on near real-time basis, for all the e-Services integrated with eTaal.

The counter also provides the total number of e-Services integrated, the count of which gets updated every time when a new service is approved and integrated on eTaal.

The screenshot of the same is attached as below:

	1	op 5 Standard Servi	ces of May 2016	
Rural Development	Agriculture & Allied	Commercial Tax	Court and Judiciary	Utility Services and Bill Payment

The homepage of eTaal displays the names of Top 5 Projects and States/UTs on the basis of the monthly e-transaction count. The details of the following are displayed as a moving slider updated on monthly basis:

- Top 5 States of Month 2016
- Top 5 Central Projects of Month 2016
- Top 5 Standard Services of Month 2016
- Top 5 Central MMPs of Month 2016
- Top 5 State MMPs of Month 2016
- Top 2 Union Territories of Month 2016

The homepage also displays the graphical view under each of the above data as a moving slider updated on monthly basis.

Just below the details of Top 5 Projects and States/UTs on the basis of the monthly e-transaction count, the section of homepage provides the description of eTaal as below:

**Otion** is a web portal for dissemination of e-Transactions statistics of National and State level e-Governance Projects including Mission Mode Projects. It receives transaction statistics from web based applications periodically on near real time basis. eTaal presents quick analysis of transaction counts in tabular and graphical form to give quick view of transactions done by various e-Governance projects.

-----------	---------------------------------	----------------	-------------

The downloads section on eTaal Homepage provides links to download the following User documents:

- i. eTaal User & Technical Document
- ii. eTaal Brochure
- iii. Android App

### 5. e-Transactions View: Menu Tab

### 5.1 **TABS**

Central Govt Projects	State Govt Projects	Standard Services	Mission Mode Projects	AcrossTheCounter	NOFN	Categories
-----------------------	---------------------	-------------------	-----------------------	------------------	------	------------

Various types of e-Transactions are displayed in each tab, 'Central Govt. Projects' being the default option displaying total number of transactions between two user-defined dates (From date and To Date). By default, display is in tabular format which can be changed to Bar Chart and Pie Chart by the user.

1.	Central Govt Projects	This tab enables the user to view e-Transaction count of all Central Govt. Projects.
2.	State govt Projects	This tab enables the user to view e-Transaction count of State govt. Projects.
3.	Standard Services	This tab enables the user to view Standard Service wisee- Transaction counts.
4.	Mission Mode Projects	This tab enables the user to view e-Transaction count of various MMPs.
5.	Across The Counter	This tab enables the user to view e-Transaction count of services delivered Across the counter.
6.	NOFN	This tab enables user to view e-Transaction count of services delivered on National Optical Fibre Network (NOFN).
7.	Categories	This tab enables the user to view Category-wise e-Transaction count.

#### 5.2 DATE WISE VIEW

1. Select required tab from the above mentioned tabs under the "e-Transactions view" menu tab.

NATIONAL CO	from*	01-01-2016 (DD-MM-YYY)	Display Type Tabular Data	
CENTRE	To*	21-06-2016 (DD-685-1997)	 Submit	

Type From-Date & To-Date in the text boxes or select dates from calendar (by clicking on calendar icon).

- 2. Select the display type between Tabular data, Bar Chart and Pie Chart
- 3. Click Submit button.

### 5.3 CENTRAL GOVT. PROJECTS

This tab enables the user to view e-Transaction data related to Central Govt. projects.

- e-Transaction data between two particular dates is filtered out and displayed by selecting the 'From date' and 'To Date'.
- Same data can be viewed in bar chart and pie chart, by selecting display Type in the dropdown list provided below the chart.
- Each service can be clicked to further drill-down for details.

Pie Chart View of Central Govt. Projects

### 5.3.1. Drilled-down Central Govt. Projects

Central Govt. Projects can be further drilled-down by clicking on Project name. Following is the drilled-down view of CSC Project.

Drilled-down Time-line Analysis to view Standard Service Wise Transactions

#### 6.2 Comparative Analysis

This menu item enables the user to perform an analysis of the variation in e-Transaction count over a period of time e.g. number of e-Transactions in the current year as compared to the number of e-Transactions recorded in a selected year. Or comparison between number of e-transactions recorded in a particular month this year with respect to the number of e-Transactions recorded in the specified year for the same month.

#### 6.3 Line Chart Analysis

User can perform Year Wise, State Wise and Service Wise analysis of no. of e-Transactions by selecting desired year from the drop down list. Following screenshot shows the Year Wise analysis for the year 2016.

Following screenshot shows the State Wise analysis for the year 2016.

Following screenshot shows the Standard Service Wise analysis for the year 2016.

#### 6.4 Analysis of Services

User can perform Service Wise analysis of no. of e-Transactions by selecting desired year from the drop down list. On opening the screen for Analysis of services, the user will see by default the bubble chart/analysis for the Standard Service "Certificate" during the year 2016.Following screenshot shows the Analysis of services for the year 2016 with the default service as "Certificate".

The User can further select specific services from the drop down menu for the comparison and analysis among specific number/type of services. The size of a bubble displays the total number of projects under a particular standard service. The screenshot for the same is attached as below:

On selection of the multiple services from the drop down the data for only the selected services would be displayed as bubble chart for the analysis. The reference screenshot is attached below.

#### 7.3 Category Wise Transaction

This report provides the details of number of e-Transactions captured under various categories of e-Services (A,B, C, D, E, F) for the Central and State Projects.

The User has the option to select and generate the report under following two categories:

- 1. Central Wise Report
- 2. State Wise Report

The following screenshot provides the search parameters available to Users for the generation of report for Category Wise Transaction for Central and State Projects. The user has the provision to select the date range for the period for which the report needs to be generated.

### 8. Service Directory

In order to facilitate the view of services being under taken across the country, a Service directory has been developed. Service directory helps citizen in finding state level services grouped in a particular standard service. It provides the details of e-Governance application delivering the service such as name of dept., description of service etc., also provides the details of spatial spread for a given service. The user can view the service directory and search for relevant information for the services.

An external link to eTaal Service directory has been added on digital India Homepage.

# 9. State Portal

A personalized portal for states and union territories by the name of "State Portal" is implemented on the eTaal website. It helps citizen in finding state level services grouped in a particular standard service.

The link "State Portal" on the eTaal dashboard, allows the users of different states to view the transaction counts. It is internally managed and allows a comparable analysis of the states on the basis of the transaction counts available on eTaal.

This interface contains separate links for all the 36 states and union territories. The link of individual states further redirects the user to the individual state portal from where a user can view the total transaction count and the e-Transaction count of the various standard services integrated with the specific state.

### The below screenshot shows the State Portal of Delhi:

The User can click on e-Transaction View to further view the drilled down view of Standard Services of Delhi

### **12.1** Sector/Project Entry

Entry of the project is done by the owner of the project. The owner needs to specify the Project name along with the person who has requested for the entry of it. Screenshot of the project entry page is shown below:

Advention	Language   T			Lingsut Change Password
8	ector/Project Entry	● State ○ Central Projects ○ G	thers	
	State *	Select	Sector/Project Name	E 4
	Contact Person Name*	Project Admin	Designation *	Admin
	Email 1D *	projadnir@ric.in	Contact No *	9999888811
	Request For Fort Opening			
		Save Show	List Clear	

Once all the details of the person along with the Project name are entered, it can be saved by clicking on the Save Button. Complete list of the projects can be viewed by clicking on the 'Show List' Button. Clear Button is used to clear the details already entered in the current screen. The Approve Button is used to approve the list and save it permanently in the database.

### **12.2** Service Entry

Entry of service is done by the owner of the project. He/she needs to specify the Service name along with the person who has requested for the creation of it. Screenshot of the service creation page is shown below:

2 Select Language V					Logout Change Password
Admin Corner > Service Entry					
Name	Project Admin	1	Designation *	Admin	
Contact No. *	9995878ALL		Consil ID *	projadningmic.in	
Sector / Project	- Kalart	NI Add New	Columna *	Falart	101
Standard Service Name *	-Select-	()	Minor Service Name *	-Delect-+	Add Nev

		ter Store	tal Gw	2.2.3 <b>4</b> 99.969.969.967.866	

Service creation consists of two sub-sections:

1. 'Service Reported By and Service details' Section: In this section, details of the person who is reporting the service is entered. The name, designation, contact no. and email id is captured.

Also, details of services are entered in following format:

- a. Select Project, Category (A, B, C, D, E, F), Major Service (Standard Service), Minor Service (Sub Standard Service).
- b. Enter local name of service to be added and brief description of the service.
- c. Check whether the service is across counter or mission mode project.
- 2. 'e-Transaction Benchmark' Section: All the benchmark are required to be fulfilled by the e-Service to participate in eTaal which are as follows:
  - a. Service is requested through electronic means including mobile devices.
  - b. Workflow/approval process is electronic.
  - c. Database is electronic/digitized.
  - d. Service delivery is electronic.

### **12.3 Modify Service**

After the successful creation of service by the owner under the "Service Entry" link as explained above, if required, the owner can modify the service details under the "Modify Service" link of Service Enrolment. The screenshot of the Modify Service screen is shown as below:

### 12.4 Web Service Enrolment

Web service can be registered by owner of the project. He/she needs to register the Web Service along with the details. This module is smart enough to identify and verify the correctness of the input parameter and output parameter.

Data exchange in eTaal is based on web service. This page is used to add new web services/URLs in following steps:

- 1. Select type of web service: Whether it is Web Reference Based or Web URL based.
- 2. Select State and Project Name.
- 3. Enter the complete URL of web service.
- 4. Enter 'Web Service Name' (Name of the class used in web service) and press 'Invoke Service'.
- 5. System will show all the methods available under selected web service.
- 6. Select the desired method name, system will show all the input parameters available under that selected web method. At the same time, it shows Return type of the method.
- 7. It provides Test Area which accepts the value of the input parameter and tests the output of the service using 'Get Data' button.
- 8. Click on 'Save URL' button to save the web service in eTaal application.

Once the entire process as stated above is complete, the service is ready for integration with eTaal. Before integration, the e-Service is subject to validation and approval by the National Level Project Management Committee (PMC). Similar Committees exist at the level of States and UTs.

# **13. Approval**

#### **Steps for Service Approval by State Project Management Committee**

For the Approval/Rejection/Modification of the service as enrolled by the User, the State Admin needs to login to eTaal using its login credentials. The login screenshot is shown as below.

Cotool Heatmak Transaction Aggregation & Assalytis Layer	Department of Electronics & Information Technology
National e	eTaal Admin Login HRAdmin
Since 1 <sup>st</sup> Jan, 2016 <b>2 , 40 , 36 , 58 ,</b> <sup>–</sup>	Forkof         Since 1 <sup>st</sup> May, 2016           Forgot Password7         588,88,4100

The State Admin can review the services and accordingly "Accept", "Reject" or "Modify" the service.

In case of Approval of service by the State Committee, the State Admin needs to select the radio button "A" and on clicking the "Submit" button, this service is forwarded to National eTaal Committee for approval.

For the approval of service, the service needs to be approved by atleast two State Committee members.

The State Admin needs to enter Remarks in case if "Reject" or "Modify" is selected, highlighting reason for rejection or modification of the service requested.

The service needs to be rejected / approved by atleast two out of three State committee members while it can be requested for modification by any one member.

#### Steps for Service Approval by National Project Management Committee

On Approval of the service by State Committee members, the service is forwarded to National eTaal Committee for approval.

To initiate the service approval process, the National eTaal Committee member needs to login to eTaal using its login credentials. The login screenshot is provided as below:

Otool thetroit Instantion	Department of Electronics & Information Technology

The National Committee just like the state admins needs to enter Remarks in case "Reject" or "Modify" is selected, highlighting reason for rejection or modification of the service requested.

The service needs to be rejected/approved by three out of the five national committee members while it can be requested for modification by just one member.

After 3 levels of service Approval by the National Committee, this service is forwarded to Service admin for data verification of the service.

### Steps for data Verification

After approval of the service by the National Project Management Committee, the service is now under data verification stage and needs to be approved by Service Admin.

For providing approval under verification stage, the Service admin needs to login on eTaal using his login credentials as per the below screenshot.

<b>Otool</b> Alexandre Transaction Aggregation & Acadysis Layer	Department of Electronics & Information Technology
Henre e transactions View Analysis Report Survice Director <b>National e</b> Since 1 <sup>st</sup> Jan, 2016 <b>2,40,35,52,5</b>	eteal Admin Login ServiceAdmin NR8441 NR8447 Togin Forget Password? Forget Password?
Total Nit	mber of e-Services Integrated 3,002

The e-Transaction count of the service is checked and verified for a specific period of time and if the count is less than or equal to the average count acceptable for the service, then Approval is given by the Service Admin to make service live on eTaal portal. However, in case the count is greater than the average, the service provider is questioned regarding the same through mail.

# **14. Technical Specifications of eTaal**

Technical Specifications	Description				
Technology	Microsoft Technologies with WCF, ASP.NET Framework 4.0, C#.Net				
Operating System	Windows Server 2008 R2 Enterprise Edition				
Database	SQL Server 2012 R2				
Analytical Tool	Fusion Chart				
Browser Supported	IE 7.0 or above, Mozilla Firefox 3.6 or above, Safari, Chrome 15.0 or above				
Reporting	HTML Reporting				
Minimum System Specification	Any desktop, laptop, tablet and mobile phones (Android/Windows/iOS, etc) with internet Access				
Unicode Compliant	Yes				
Concurrent Access	Yes				

## **15. Architecture**

eTaal is broadly categorized into the following three components:

#### 1. Dashboard Server Connector (DSC)

Dashboard Server Connector (DSC) runs as a service on Central Server and acts as watchdog to pull the e-Transaction count from various servers located at State and Centre.

#### 2. Dashboard Client Connector (DCC)

Dashboard Client Connector (DCC) runs as a service on the Servers which are providing the e-Transaction count details.

#### 3. eTaal Portal

eTaal Portal is a web portal to give view of dashboard.

Architecture of eTaal

In the architecture of eTaal drawn above, one dSC and multiple dCCs exists. One dCC is for each application.

# **16. Guidelines**

This section provides guidelines for application administrator / developer to create Client Connector and deploy on their servers.

### 16.1 Prerequisites for participation in eTaal

- 1. Server on which the data that needs to be integrated with eTaal resides must be on Internet.
- 2. The application whose data needs to be integrated with eTaal may be on any operating environment (Windows/Linux; SQL Server/Oracle/MySQL/PostGreSQL; .Net /Java/PHP etc.)

### 16.2 Steps for creation of Client Connector

Client Connector may be Web Service, WCF service or URL based data sharing application. Client Connector may be written in any language(C#, VB.Net, Java, PHP etc.). Creation of Client Connector will consist of following steps:

- 1. Creation of Web Service or WCF service or URL based data sharing application
- 2. Creation of 'Stored Procedure' in the database which will give count of e-Transaction to web connector
- 3. Writing of the code to access stored procedure created to get the e-Transaction count.

### 16.3 Specifications of Client Connector

The **specifications** of Client Connector are given below:

Web Method Name: e-Transaction Count

**input Parameters:** The web method created for the purpose will have following parameters:

S.No.	Parameter Name	Format	Example
1	Transaction date	dd/MM/YYYY	23/11/2012
2	User Name	String	MeitY
3	Password	String	xYz#\$36F

**Response Type:** The web method will return either XML or dataset.

Format of XML:

Format of dataset:

This will have following set of data: Service Code, Service Count, Location Code

	-	
S.No.	Error Code	Error Description
1	-1	Transaction date parameter is missing
2	-2	Wrong credentials
3	-3	Data is not available on this date

#### Error Code Returned by Service

#### 16.4 Development and hosting environment

- 1. Client Connector can be created in any of the programming language i.e. Java, C#, VB. Net, PHP etc.
- 2. It can be hosted on any web server i.e. IIS, Apache Tomcat etc.

#### 16.5 Post deployment steps

- 1. The port on which the service is running is required to be opened for eTaal Server Connector.
- 2. Share the URL of Web Service with User Name and Password to eTaal Administrator.

#### 16.6 Data pulling mechanism and assumptions

Enrolment of web service by user

- 1. Web service is created by user and hosted on server where project (State/Central) related data resides.
- 2. Port opening request is made to provide communication between servers (i.e. from Project server to eTaal server).
- 3. Enrolment of web service is done from enrolment page (in Admin Corner) of eTaal.

eTaal Process of data pulling from a project

- 1. Port opening request is made to provide communication between servers (i.e. from eTaal server to the project server).
- 2. Approval of registration by Project Management Committee (PMC).
- 3. eTaal fetches data on daily basis by invoking web service with current date as parameter and following data is obtained:
  - a. List of services provided by project on given date.
  - b. Transaction count.
  - c. Date of transaction.
  - d. Location Code as per census (if any).
- 4. The Process of invoking web service is done as per schedule determined by the user during enrolment and data is updated (in case of zero transaction of service, no data is updated) in eTaal.
- 5. For projects having irregular data updating services, web service is invoked by eTaal, it will check for last update (date/time) and pull data from that date.
- 6. Reconciliation of data between eTaal and project server to be combined once a week.

### Assumptions

- 1. The web service could be hosted on live server or on intermediate server, as defined during enrolment.
- 2. Data updated on the project server is accumulative during the day and is reset to zero at 00:00 hrs.

#### 16.7 Sample Codes

#### Sample Code in .Net

#### Interface

```
[ServiceContract]
public interface IeTaalService
{
    [OperationContract]
    [FaultContract(typeof(InvalidCodeFault))]
    int eTransactionCount(DateTime TransactionDate,String UserName,String Password);
```

#### implementation of interface

```
public class eTaalService : letaalService
ł
    #region Call StoreProcedure and Fetch Transaction
    string ConnectionString - System.Configuration.ConfigurationSettings.AppSettings["connectionstring"];
    public DataSet eTransactionCount(DateTime TransactionDate, String UserName, String Password)
    ł
        try
        t
             var parms = new SqlParameter[3];
             parms[0] = new SqlParameter("@TransactionDate ", TransactionDate);
             parms[1] = new SqlParameter("@UserName", UserName);
parms[2] = new SqlParameter("@Password", Password);
             return (SqlHelper.ExecuteDataset(ConnectionString, CommandType.StoredProcedure, "SP_eTransactionCount", parms));
        )
        catch (Exception ex)
        1
             throw new FaultException<InvalidCodeFault>(new InvalidCodeFault(ex.Message), new FaultReason(ex.Message));
        3
    )
```

#### Sample Code in Java

```
package in.nic.exchange.action/
import in.nic.exchange.db.DBConnection/
import java.sql.Connection;
import java.sql.PreparedStatement;
import java.sql.ResultSet;
import java.sql.SQLException;
